Portable Cooling & Ventilation For People & Equipment

ABG Mancoolers produce High Flow, High Velocity air streams that in turn, induce movement in the surrounding air. The volume of moving air actually increases with the distance of travel, so that effective air movement is obtained over large distances.

Air movement produces a cooling effect by:

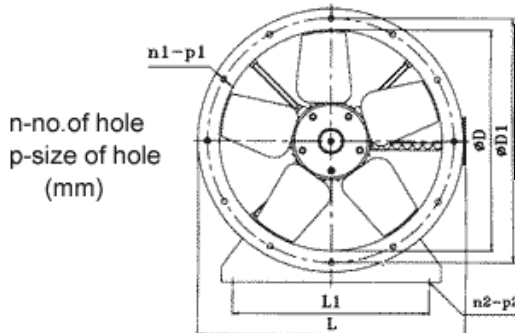

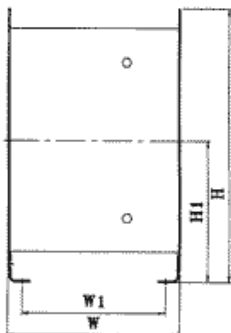

- Increasing the rate of evaporative heat loss eg: evaporation of perspiration from the skin.
- Increasing the rate of convective heat loss from hot surfaces into the air stream, eg: movement of air through an engine radiator.
- The dilution or deflection of a hot air stream by a cooler one.

Features –

- Heavy Duty steel casing
- 610mm High Performance Fan
- Finger Proof Mesh Guards
- Easily Fits Through Internal Doorways.

Specifications

- Discharge Flow Rate 3725 l/s (13,410m³/h)
- Sound Level 78 dB(A)
- Motor 800 Watts @ 1400 RPM
- Power 240V AC, Rated @ 4.10 Amps
- IP44 Rating.
