

Plant and Equipment Risk Assessment

	Hired From All Master Hire Stores		Vehi	icle - Utility		Assessed By:	Steven Jose	
Equipment Location:		Equipment:				Signature:	ff-	
		Manufacturer Details	Vari	ous				
Hazard	'	Action Require Yes/No	ed	Risk Level (Refer to risk matrix)	Hierarchy of Control	Hazard and Risk Treat Report Form)	ment (Complete Hazard	Risk Level after Risk Treatment (Refer to risk matrix)
Entanglemen	t							
Can anyone's hair, clothing, gloves, necktie, jewellery, cleaning brushes, rags or other materials become entangled with moving parts of the plant, or materials in motion?		⊠ Yes □ No		MEDIUM	☐ Elimination ☐ Substitution ☐ Isolation ☐ Engineering ☐ Administration ☐ PPE	Follow manufacturers' instructions Do not lean or reach into engine area with motor running Do not do any servicing or maintenance with motor running		LOW
Crushing								•
Can anyone be crushed due to: Material falling off the plant? Uncontrolled or unexpected movement of the plant or its load? Lack of capacity for the plant to be slowed, stopped or immobilized? The plant tipping or rolling over? Parts of the plant collapsing? Coming in contact with moving parts of the plant during testing, inspection, use, maintenance, cleaning or repair? Being thrown off or under the plant? Being trapped between the plant and materials or fixed structures? Other factors?			Yes		Follow manufacturers' instructions for vehicle Ensure travel path of moving vehicle (forward or reversing) is free of all personnel or obstructions Use spotter in restricted areas Ensure all loads are placed and secured on tray of vehicle within legal parameters(height, width, length & weight) Ensure load restraints are in good order		MEDIUM	
Cutting, Stab	bing and Puncturing							
ComingComing	e be cut, stabbed or punctured due to? g in contact with sharp or flying objects? g in contact with moving parts of the plant during inspection, operation, maintenance, cleaning or	⊠ Yes □ No		MEDIUM	☐ Elimination ☐ Substitution ☑ Isolation ☐ Engineering ☑ Administration ☐ PPE	Follow manufacture Do not lean or reac with motor running Do not do any serv	h into engine area	Low

Authorised by: General Manager - Safety & Personnel Date: 13/06/2023 Review Date: June 2024 Issue No: 1 Page 1 of 6

Plant and Equipment Risk Assessment

			maintenance with motor running Ensure all loads (equipment, tools and materials) are securely restrained before moving vehicle	
⊠ Yes □ No	HIGH	☐ Elimination ☐ Substitution ☑ Isolation ☐ Engineering ☑ Administration ☐ PPE	Follow manufacturers' instructions Do not lean or reach into engine area with motor running Do not do any servicing or maintenance with motor running	MEDIUM
			-	
⊠ Yes □ No	LOW	☐ Elimination ☐ Substitution ☑ Isolation ☐ Engineering ☑ Administration ☐ PPE	Follow manufacturers' instructions Do not lean or reach into engine area with motor running Do not do any servicing or maintenance with motor running Allow motor and other components to cool before servicing	LOW
			· · · · · · · · · · · · · · · · · · ·	
⊠ Yes □ No	ACUTE	⊠ Elimination □ Substitution □ Isolation ⋈ Engineering ⋈ Administration □ PPE	Follow manufacturers' instructions for vehicle Ensure travel path of moving vehicle (forward or reversing) is free of all personnel or obstructions Use spotter in restricted areas Ensure all loads are placed and secured on tray of vehicle within legal parameters(height, width, length & weight) Ensure others do not come between vehicle and load at any time Ensure exclusion zone in and around vehicle while loaded using mechanical aids (e.g. skid steer loader, excavator)	HIGH
	No Yes No Yes No	☐ No Yes ☐ No LOW ☐ No Yes ☐ ACUTE	Substitution Substitution Isolation Engineering Administration PPE Yes	Ensure all loads (equipment, tools and materials) are securely restrained before moving vehicle Yes

Authorised by: General Manager - Safety & Personnel Date: 13/06/2023 Review Date: June 2024 Issue No: 1 Page 2 of 6

Plant and Equipment Risk Assessment

High Pressure Fluid					
Can anyone come into contact with? Fluids under high pressure in normal use, in the instance of plant failure?	☐ Yes ☑ No	LOW	☐ Elimination ☐ Substitution ☐ Isolation ☐ Engineering ☐ Administration ☐ PPE		LOW
Electrical					
Can anyone be injured by electrical shock or burnt due to: The plant contacting live electrical conductors? Plant working close to electrical conductors? Overload of electrical circuits? Damaged or poorly maintenance electrical leads or cables? Damaged electrical switches? Water near electrical equipment? Lack of isolation procedures? Other factors	⊠ Yes □ No	ACUTE	⊠ Elimination □ Substitution ☑ Isolation □ Engineering ☑ Administration □ PPE	Follow manufacturers' instructions Do not operate in areas with overhead wiring or other obstructions	HIGH
Explosion					
Gases, vapors, liquids, dusts or other substances triggered by the operation of the plant or by materials handled by the plant?	☐ Yes ☑ No	LOW	☐ Elimination ☐ Substitution ☐ Isolation ☐ Engineering ☐ Administration ☐ PPE		LOW
Slipping, tripping and Falling			·		
Can anyone using the plant, or in the vicinity of the plant, slip, trip or fall due to: Uneven or slippery work surfaces? Poor housekeeping, such as shavings in the vicinity of the plant, spillage not cleaned up? Obstacles being placed in the vicinity of the plant? Other factors?	⊠ Yes □ No	MEDIUM	☐ Elimination ☐ Substitution ☐ Isolation ☑ Engineering ☑ Administration ☑ PPE	Follow manufacturers' instructions Wear appropriate footwear Use steps provided when getting in/on vehicle Always observe 'three points of contact' if need to get on/in vehicle Maintain cleanliness of vehicle (inside and out)	LOW
High Temperature					
Can anyone: Come into contact with objects at high temperature? Be injured by fire?	⊠ Yes □ No	MEDIUM	☐ Elimination☐ Substitution☐ Isolation☐ Engineering	Follow manufacturers' instructions Do not lean or reach into engine area with motor running	LOW

Plant and Equipment Risk Assessment

Temperature and Thermal Comfort Can anyone suffer ill-health due to:	⊠ Yes	MEDIUM		Do not do any servicing or maintenance with motor running Allow motor and other components to cool before servicing Follow manufacturers' instructions	LOW
Exposure to high or low temperatures?Failure of air conditioning equipment?	□ No		☐ Isolation☐ Isolation☐ Engineering☐ Madministration☐ PPE	Do not leave persons or animals unattended in vehicle	
Suffocation					
 Can anyone be suffocated due to: Lack of oxygen, or atmospheric contamination? 	⊠ Yes □ No	MEDIUM	 ☑ Elimination ☐ Substitution ☐ Isolation ☐ Engineering ☒ Administration ☐ PPE 	Follow manufacturers' instructions Do not leave persons or animals unattended in vehicle Operate in well-ventilated areas only Keep windows up with air-conditioning on in dusty environs	LOW
Ergonomics					
Can anyone be injured due to: Poorly designed seating? Repetitive body movements? Constrained body posture or the need for excessive effort? Design deficiency causing physical or personal stress? Inadequate or poorly placed lighting? Lack of consideration given to human error or human behavior? Mismatch of the plant with human traits and natural limitations? Other factors?	⊠ Yes □ No	LOW	⊠ Elimination □ Substitution □ Isolation ⊠ Engineering ⋈ Administration □ PPE	Follow manufacturers' instructions Take regular breaks/rests Exercise/stretch regularly	LOW

Plant and Equipment Risk Assessment

Other Hazards						
Can anyone be injure	ed or suffer ill-health from exposure to: apors?	⊠ Yes □ No	LOW	⊠ Elimination □ Substitution □ Isolation ⋈ Engineering ⋈ Administration ☑ PPE	Follow manufacturers' instructions Operate in well-ventilated areas only Keep windows up with air-conditioning on in dusty environs Ensure dash camera and reverse camera are fully operational Observe all road/site traffic management rules Maintain vehicle in good working order - report any malfunction or damage to Master Hire immediately and stop using equipment where it is reasonable to foresee further risk to persons or damage to equipment	LOW
Further Comments:	A Specific Risk Assessment on site mu	ıst been undertak	cen prior to pla	nt operation.		
	This equipment must only be driver	n/operated by co	ompetent pers	sons and hold	lers of the appropriate license	
Checklist:	 ✓ Various Manufacturers' manuals reference ✓ Copy kept in Master Hires' Risk Management

Plant and Equipment Risk Assessment

Hazard / Risk Matrix

Reference: Workplace Health and Safety Queensland - Risk Assessment - Supplement 2
Risk Management Code of Practice 2007

Step 1 Determine Likelihood – What is the possibility of the event happening?

	Criteria	Description
Almost certain	Expected in most circumstances.	Event is a common problem
Likely	Will probably occur in most circumstances.	Event is known to have occurred at this site or it has happened
Possible	Might occur at some time	Event could occur at the site or I've heard of it happening
Unlikely	Could occur at some time	Event is not likely to occur at the site or I have not heard of it happening
Rare	May occur only in exceptional circumstances	Event is practically impossible.

Step 2 Determine Consequence - What will be the result if it happens?

Classification	Example detail description
Insignificant	No injuries
Minor	First aid treatment only; spillage contained at site.
Moderate	Medical treatment; spillage contained but with outside help.
Major	Extensive injuries; loss of production
Catastrophic	Death; toxic release of chemicals

Step 3 Determine the risk score

	CONSEQUENCE								
LIKELIHOOD	Insignificant	Minor	Moderate	Major	Catastrophic				
Almost certain	3 High	3 High	4 Acute	4 Acute	4 Acute				
Likely	2 Medium	3 High	3 High	4 Acute	4 Acute				
Possible	1 Low	2 Medium	3 High	4 Acute	4 Acute				
Unlikely	1 Low	1 Low	2 Medium	3 High	4 Acute				
Rare	1 Low	1 Low	2 Medium	3 High	3 High				

Step 4 Record risk score against the job sequence steps

(Note - Risk scores have no absolute value and should only be used for comparison and to engender discussion.)

Score	Action
4 A: Acute	ACT NOW – Urgent – do something about the risks immediately. Requires immediate attention.
3 H: High	Highest management decision is required urgently.
2 M: Medium	Follow management instructions.
1 L: Low	OK for now. Record and review if any equipment/ people/ materials/ work processes or procedures change.
