Plant and Equipment Risk Assessment

Cutting, Stabbing and Puncturing					
 Can anyone be cut, stabbed or punctured due to? Coming in contact with sharp or flying objects? Coming in contact with moving parts of the plant during testing, inspection, operation, maintenance, cleaning or repair of the plant? Plant, parts of the plant or work pieces disintegrating? Work pieces being ejected? The mobility of the plant? Uncontrolled or unexpected movement of the plant? Other factors? 	⊠ Yes □ No	Medium	☐ Elimination ☐ Substitution ☑ Isolation ☑ Engineering ☑ Administration ☑ PPE	Follow Instructions in Operator Manual Specific site Hazard Assessment must be conducted before operation Maintain Operating Exclusion Zone while machine is in use Only competent persons to operate plant Appropriate PPE must be worn	Low
Shearing					
Can anyone's body parts be: Sheared between two or more parts of the plant, or between a part of the plant and a work piece or structure?	⊠ Yes □ No	Acute	☐ Elimination ☐ Substitution ☑ Isolation ☑ Engineering ☑ Administration ☑ PPE	Follow Instructions in Operator Manual Specific site Hazard Assessment must be conducted before operation Maintain Operating Exclusion Zone while machine is in use Only competent persons to operate plant Appropriate PPE must be worn	High
Friction		-	1		•
Can anyone be burnt, gain abrasions etc due to: Contact with moving parts or surfaces of the plant, or material handled by the plant? 	⊠ Yes □ No	Medium	☐ Elimination ☐ Substitution ☑ Isolation ☑ Engineering ☑ Administration ☑ PPE	Follow Instructions in Operator Manual Keep body and materials away from wheels while moving	Low
Striking					
 Can anyone be struck by moving objects due to: Uncontrolled or unexpected movement of the plant or material handled by the plant? Plant, parts of the plant or work pieces disintegrating? Work pieces being ejected? Mobility of the plant? Other factors? 	⊠ Yes □ No	Acute	☐ Elimination ☐ Substitution ☑ Isolation ☑ Engineering ☑ Administration ☑ PPE	Follow Instructions in Operator Manual Specific site Hazard Assessment must be conducted before operation Maintain Operating Exclusion Zone while machine is in use Only competent persons to operate plant Do not carry passengers on or in machine Always check to see that there are no	High

Plant and Equipment Risk Assessment

				obstacles and/or persons in the vicinity when moving Appropriate PPE must be worn	
High Pressure Fluid					
Can anyone come into contact with? Fluids under high pressure in normal use, in the instance of plant failure?	⊠ Yes □ No	High	☐ Elimination ☐ Substitution ☑ Isolation ☑ Engineering ☑ Administration ☑ PPE	Follow Instructions in Operator Manual Specific site Hazard Assessment must be conducted before operation Only competent persons to operate plant Do not operate machine where faults or leaks are evident or suspected Appropriate PPE must be worn	High
Electrical					
Can anyone be injured by electrical shock or burnt due to: The plant contacting live electrical conductors? Plant working close to electrical conductors? Overload of electrical circuits? Damaged or poorly maintenance electrical leads or cables? Damaged electrical switches? Water near electrical equipment? Lack of isolation procedures? Other factors	⊠ Yes □ No	Acute	⊠ Elimination □ Substitution ☑ Isolation □ Engineering ☑ Administration ☑ PPE	Follow Instructions in Operator Manual Specific site Hazard Assessment must be conducted before operation Maintain Operating Exclusion Zone while machine is in use Only competent persons to operate plant Appropriate PPE must be worn	High
Explosion					
Gases, vapors, liquids, dusts or other substances triggered by the operation of the plant or by materials handled by the plant?	☐ Yes ☑ No		☐ Elimination ☐ Substitution ☐ Isolation ☐ Engineering ☐ Administration ☐ PPE		
Slipping, tripping and Falling					
Can anyone using the plant, or in the vicinity of the plant, slip, trip or fall due to: Uneven or slippery work surfaces? Poor housekeeping, such as shavings in the vicinity of the plant, spillage not cleaned up? Obstacles being placed in the vicinity of the plant?	⊠ Yes □ No	Medium	☐ Elimination ☐ Substitution ☐ Isolation ☑ Engineering ☑ Administration ☑ PPE	Follow Instructions in Operator Manual Specific site Hazard Assessment must be conducted before operation Only competent persons to operate plant Do NOT operate machine travelling on	Low

Plant and Equipment Risk Assessment

Other factors? High Temperature				slope - the machine could increase the speed out of control with the possibility of serious consequences for the safety of operator and the proximity persons. Appropriate PPE must be worn	
Can anyone: Come into contact with objects at high temperature? Be injured by fire?	⊠ Yes □ No	Medium	⊠ Elimination □ Substitution □ Isolation ⋈ Engineering ⋈ Administration ⋈ PPE	Do not remove guards or safety devices Follow Instructions in Operator Manual Specific site Hazard Assessment must be conducted before operation Maintain Operating Exclusion Zone while machine is in use Do not place any hot materials into bin e.g. coals from fire Only competent persons to operate plant Appropriate PPE must be worn	Low
Temperature and Thermal Comfort					
Can anyone suffer ill-health due to: Exposure to high or low temperatures? Failure of air conditioning equipment?	☐ Yes ☒ No		☐ Elimination ☐ Substitution ☐ Isolation ☐ Engineering ☐ Administration ☐ PPE		
Suffocation					П
 Can anyone be suffocated due to: Lack of oxygen, or atmospheric contamination? 	⊠ Yes □ No	Low	☐ Elimination ☐ Substitution ☑ Isolation ☐ Engineering ☑ Administration ☑ PPE	Follow Instructions in Operator Manual Specific site Hazard Assessment must be conducted before operation Only competent persons to operate plant Only operate where adequate ventilation is available - Never use the machine inside enclosed areas Appropriate PPE must be worn	Low

Plant and Equipment Risk Assessment

Hazard / Risk Matrix

Reference: Workplace Health and Safety Queensland - Risk Assessment - Supplement 2
Risk Management Code of Practice 2007

Step 1 Determine Likelihood – What is the possibility of the event happening?

	Criteria	Description
Almost certain	Expected in most circumstances.	Event is a common problem
Likely	Will probably occur in most circumstances.	Event is known to have occurred at this site or it has happened
Possible	Might occur at some time	Event could occur at the site or I've heard of it happening
Unlikely	Could occur at some time	Event is not likely to occur at the site or I have not heard of it happening
Rare	May occur only in exceptional circumstances	Event is practically impossible.

Step 2 Determine Consequence - What will be the result if it happens?

Classification Example detail description	
Insignificant	No injuries
Minor	First aid treatment only; spillage contained at site.
Moderate Medical treatment; spillage contained but with outside help	
Major	Extensive injuries; loss of production
Catastrophic	Death; toxic release of chemicals

Step 3 Determine the risk score

	CONSEQUENCE						
LIKELIHOOD	Insignificant	Minor	Moderate	Major	Catastrophic		
Almost certain	3 High	3 High	4 Acute	4 Acute	4 Acute		
Likely	2 Medium	3 High	3 High	4 Acute	4 Acute		
Possible	1 Low	2 Medium	3 High	4 Acute	4 Acute		
Unlikely	1 Low	1 Low	2 Medium	3 High	4 Acute		
Rare	1 Low	1 Low	2 Medium	3 High	3 High		

Step 4 Record risk score against the job sequence steps

(Note - Risk scores have no absolute value and should only be used for comparison and to engender discussion.)

Score	Action
4 A: Acute	ACT NOW – Urgent – do something about the risks immediately. Requires immediate attention.
3 H: High	Highest management decision is required urgently.
2 M: Medium	Follow management instructions.
1 L: Low	OK for now. Record and review if any equipment/ people/ materials/ work processes or procedures change.
